WORK EXPERIENCE

convverse.ai

Sep 2025 - Nov 2025

Freelance Backend Developer

- Developed backend APIs integrating Salesforce with Convverse.ai's infrastructure and deployed services on AWS.
- Optimized and redesigned the Chrome extension to improve performance and user experience.
- Collaborated closely with the Sales team to ensure technical solutions aligned with business requirements.

Ewokee

Jun 2025 - Sep 2025

Freelance Full Stack Developer

- Built a fully responsive website based on Figma designs, optimized for fast loading and high Lighthouse performance, with Google Analytics integration for user insights.
- Developed backend features including PhonePe payment integration, therapy session booking, and automated email notifications upon successful payments.
- Collaborated closely with the designer to translate UI/UX requirements into a smooth user experience across devices.

Elements Capital

July 2024 - Nov 2024

Python Intern

- Scraped stock market data from NSE using BeautifulSoup and Selenium, covering stocks, mutual funds, indices, futures, and options.
- Automated ETL workflows to extract, transform, and load data into Amazon S3 and Snowflake.
- Collaborated with the Quantitative Finance team to ensure accurate and reliable data processing.

Third Origin LLC

Sep 2023 - Feb 2024

Python Developer Intern

- Assisted in migrating data infrastructure from MongoDB to MySQL, enhancing data quality and accessibility.
- Developed API endpoints using FastAPI and built robust backend systems, improving performance and reliability.
- Designed and implemented an end-to-end testing system with detailed test plans and documentation.

EDUCATION

Annamalai University

Specialization: AI and ML

Bachelor of Computer Science and Engineering

GPA: 8.4

- NCC 'C' Certificate - Participated in drills, camps, and community service, gaining strong discipline, teamwork, and practical leadership experience.

PROJECT WORK

- **Therapy Website (Ewokee):** Built a fully responsive website with secure PhonePe payment gateway integration. Developed a backend system to manage user requests and implemented an automated email notification system.
Tech Stack: React, Supabase, Tailwind CSS, PhonePe Payment Gateway, Headless UI.
Link: <https://ewokee.com/>
- **RAG with Gemini:** Built a RAG system using LangChain and Gemini for accurate, context-aware responses from custom data. Developed a React frontend with an interactive chat interface and document search. Integrated a vector database for fast retrieval.
Link: github.com/Esai-Keshav/rag-with-gemini-v1
- **Django React Notes App:** Built a full-stack notes application using Django REST Framework for the backend and a React frontend. Implemented secure JWT authentication for user login and protected routes.
